PEDIATRICS & NEONATOLOGY
The Hospital for Sick Children
Handbook of Pediatrics, 12e
Edited by HSC, Shawna Silver, MD, Deborah Schonfeld, MD, Siobhán Neville, Catherine Diskin
Practical and pocket sized, The Hospital for Sick Children Handbook of Pediatrics has been a trusted clinical reference for more than 50 years. The fully revised 12th edition continues this tradition of excellence with succinct, easily accessible, and evidence-based answers for the diagnosis and management of pediatric patients. Get the reliable information you need from staff pediatricians, specialists, residents, and fellows at one of the top pediatric hospitals in the world.

Due September 2021, Print Book #: UCL1 ISBN: 9780323713405 Elsevier, $118.99

Table of Contents

Section I: Acute Care Pediatrics
Chapter 1: Resuscitation
Chapter 2: Anesthesia
Chapter 3: Emergency Medicine
Chapter 4: Poisonings and Toxicology
Chapter 5: Pain and Sedation
Chapter 6: Procedures

Section II: Subspecialty Pediatrics
Chapter 7: Adolescent Medicine
Chapter 8: Allergy and Immunology
Chapter 9: Cardiology
Chapter 10: Child Maltreatment
Chapter 11: Dentistry
Chapter 12: Dermatology
Chapter 13: Development
Chapter 14: Diagnostic Imaging and Interventional Radiology
Chapter 15: Endocrinology
Chapter 16: Fluids, Electrolytes, and Acid-Base
Chapter 17: Gastroenterology and Hepatology
Chapter 18: General Surgery
Chapter 19: Genetics
Chapter 20: Growth and Nutrition
Chapter 21: Gynecology
Chapter 22: Hematology
Chapter 23: Immunoprophylaxis
Chapter 24: Infectious Diseases
Chapter 25: Metabolic Disease
Chapter 26: Neonatology
Chapter 27: Nephrology
Chapter 28: Neurology and Neurosurgery
Chapter 29: Oncology
Chapter 30: Ophthalmology
Chapter 31: Orthopedics
Chapter 32: Otolaryngology
Chapter 33: Plastic Surgery
Chapter 34: Respirology
Chapter 35: Rheumatology
Chapter 36: Transplantation
Chapter 37: Urology

Section III: Laboratory Reference Values

Section IV: Pediatric Drug Dosing Guidelines
Textbook of Neonatal Resuscitation, 8e
American Academy of Pediatrics and American Heart Association; Editor in chief: Gary M. Weiner, MD, FAAP; Associate editor: Jeanette Zaichkin, RN, MN, NNP-BC
Introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. The NRP, Eighth Edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby.

New in the Eighth Edition:
• Key Points at the beginning of each lesson.
• Quick response (QR) codes that enable the reader to view short videos about the topic on their mobile device.
• Lesson Review Questions grouped together at the end of each lesson.
• Quality Improvement Opportunities and Frequently Asked Questions in each lesson.
• New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect.
• Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.

Neonatal Care: A Quick Reference Deck
Deborah Campbell, MD, FAAP
(Albert Einstein College of Medicine, New York, NY)
This innovative deck provides primary care professionals with expert guidance on caring for newborns. Topics span everything from prenatal assessment to delivery and newborn evaluation, as well as feeding, general concerns, newborn illness, birth anomalies and skin lesions, specialized NICU care, preterm and full-term newborn concerns, and more. A series of illustrative boxes, tables, checklists, images, reference ranges, key principles, and supportive text are included in this handy deck.

Due June 2021, Print Book #: EFL69
ISBN: 9781610024419
American Academy of Pediatrics, $99.50
Red Book 2021: Report of the Committee on Infectious Diseases, 32e
David W. Kimberlin, MD, FAAP, Elizabeth Barnett, MD, Ruth Lynfield, MD, FAAP
“Refer to the Red Book.” That’s been the watchword for generations of healthcare professionals seeking trustworthy guidance on pediatric infectious disease prevention, management, and control. Now the 32nd edition continues this tradition of excellence with the latest clinical guidance on the manifestations, etiology, epidemiology, diagnosis and treatment of more than 200 childhood infectious diseases.
Due May 2021, Print Book #: KRPX7
ISBN: 9781610025218
American Academy of Pediatrics, $212.95

Red Book Pediatric Infectious Diseases Clinical Decision Support Chart, 2e
David W. Kimberlin, MD, FAAP
Fully revised and updated, the second edition of this full-color chart collects many of the most clinically useful tables, algorithms, and other items from the Red Book® and presents them in an enlarged, enhanced, colorized format that is lightweight, portable and easy to navigate. Additionally, new tables have been created exclusively for this chart, synthesizing important clinical information from the Red Book® text.
Due July 2021, Print Book #: KRPX6
ISBN: 9781610025089
American Academy of Pediatrics, $63.95

Red Book Atlas of Pediatric Infectious Diseases, 4e
Carol J. Baker, MD, FAAP (Baylor College of Medicine, Houston, TX)
The fourth edition of this best-selling Red Book® image companion aids in the diagnosis and treatment of more than 160 of the most commonly seen pediatric infectious diseases. This edition features Zika virus, chikungunya, serious bacterial infections caused by Enterobacteriaceae, Moraxella catarrhalis, human parechovirus, rhinovirus, staphylococcal food poisoning, Staphylococcus aureus, coagulase-negative staphylococcal infections, Ureaplasma urealyticum, and Ureaplasma parvum. Streamline disease recognition and clinical decision-making with hundreds of finely detailed color images, combined with updated step-by-step guidelines.

Practical Paediatric Prescribing: How to Prescribe the Most Common Drugs
Will Carroll, MD, MRCP, MRCPCH, Bm, BCh, BA, MA
(Univ. Hospital of the North Midlands, Stoke-on-Trent, UK)
Prescribing for children is problematic. Children are not small adults in terms of their physiology, and they cannot be subjects in clinical trials. This makes prescribing for them something of an art and a daunting one at that for trainees. Will Carroll (co-editor of the Illustrated Textbook of Paediatrics amongst other titles for paediatrics trainees) with a team of fellow paediatricians and a hospital pharmacist have sought to demystify prescribing for children. The team has identified what from their experience are the most common drugs prescribed to children and have addressed each one, adding detail about how each medicine works. Each chapter follows the ABCDE structure covering Absorption, Biological effects, Clearance, Dosing and side Effects in children.

Procedural Pediatric Dermatology
Andrew C. Krakowski
Many factors contribute to the challenge of performing dermatologic procedures in children including the use of different instruments, skin differences, patient and parental anxiety, pain management and anesthesia, and the need to optimize outcomes over the lifetime of the patient. Procedural Pediatric Dermatology is a first-of-its-kind reference that provides thorough, step-by-step instruction for over 100 dermatological procedures specific to the pediatric population. Using a multidisciplinary, practical approach, this unique title equips today’s clinicians to perform safe, effective care to children with guidelines and clinical pearls/tips for pre-, intra- and post-procedure strategies in addition to coding and insurance guidelines.

Harper's Textbook of Pediatric Dermatology, 4e (2 Volume Set)
Peter H. Hoeger (Univ. of Hamburg, Germany)
This fourth edition of the Harper classic provides state-of-the-art information on all aspects of skin disease in children. It covers the diagnosis and treatment of all conditions—both common and rare—with a consistently evidence-based approach. Existing content has been refreshed and fully updated to reflect emerging thinking and to incorporate the latest in research and clinical data—especially at the genetic level. This book delivers crucial clinical insights and up-to-date research information that spans the breadth of the field. As the most comprehensive reference book on this subject available, this revised fourth edition will support and guide the daily practice of both dermatologists and pediatricians across the world.

Acute Care of At-Risk Newborns (ACoRN): A Resource and Learning Tool for Health Care Professionals, 2e
Jill E. Boulton, MD, FRCP, Kevin Coughlin, MD, FRCP, MHSc, Debra O’Flaherty, RN, BScN, MSN, Alfonso Solimano, MD, FRCP
The Acute Care of at-Risk Newborns (ACoRN) program trains health care providers to stabilize that most challenging and enigmatic of medical patients: the unwell newborn. Early assessment, intervention, and management of at-risk or unstable infants can be critical for their survival and long-term health. Clinical care standards and educational programs to address these requirements are needed. The ACoRN program provides a unique, prioritized, and systematic approach to newborn stabilization for health care professionals (HCPs) with any degree of experience. ACoRN-trained providers learn to gather information, prioritize, intervene appropriately, and deliver high quality care to at-risk and unwell newborns in any setting.

Pediatric Acute Care: A Guide for Interprofessional Practice, 2e
Beth Nachtsheim Bolick, DNP, PPCNP-BC, CPNP-AC, FAAN
(Rush Univ. College of Nursing, Chicago, IL)
Stay up-to-date on the latest evidence and clinical practice in pediatric acute care with the definitive textbook in the field. Now in its second edition, this book takes an evidence-based, interprofessional approach to pediatric acute care as it exemplifies the depth and diversity that’s needed for the dynamic healthcare environments in which acutely ill children receive care. Coverage includes how to work with the pediatric patient and family, major acute care disorders and their management, emergency preparedness, common acute care procedures, and much more. With contributions from more than 200 practicing clinicians and academic experts, it represents a wide variety of disciplines including medicine, nursing, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology, among others.

Telehealth for Pediatricians, An Issue of Pediatric Clinics of North America
C. Jason Wang, Josip Car, Barry S. Zuckerman
In collaboration with Consulting Editor Dr. Bonita Stanton, the Guest Editors of this issue of Pediatric Clinics of North America have comprehensively review the current and future opportunities for implementing telehealth into pediatric practice. Expert authors have written review articles that provide information based on current knowledge of implementation of technologies but also ask questions about how to implement and what potential challenges there will be. Pediatricians will come away with the information they need to employ telemedicine in their clinical practice.

Avoiding Misdiagnosis in Pediatric Practice: In Clinical Practice Series
A. Sahib El-Radhi (Univ. of London, UK)
This book discusses the most common symptoms in pediatrics. It is based on best available scientific evidence and up-to-date information. The book also discusses a range of common conditions associated with bacterial and viral infections of the oro-nasal, eye, chest, abdominal and genito-urinary regions. The book helps the clinician to distinguish symptoms and signs of pediatric diseases to avoid diagnostic errors. Each chapter starts with a list of core messages, and includes tables and figures to focus on the subjects under discussion. The whole text is written in reader-friendly manner. The book is of interest to general pediatrics and doctors in primary care. It is also of interest to students, nurses and other professionals who look after children.
