Just Published

Vaccines for Veterinarians
Ian R. Tizard (Texas A&M Univ., College Station, TX)

Both a theoretical text and a practical handbook, Vaccines for Veterinarians is the first of its kind to bring the basic science of animal vaccination and the practical details of vaccine use together in one single volume. From the first chapter on the history of vaccination and the triumph of rinderpest eradication to the last chapter on the rapidly emerging field of cancer vaccines, this book offers a truly comprehensive grounding in established and emerging vaccines for both major and minor species. At a time when resistance to human vaccination is receiving much publicity, this evidence-based book is the ideal counter to ill-informed speculation—serving as a timely reminder that vaccination is essential for the control of infectious diseases in animals.

Basic Monitoring in Canine and Feline Emergent Patients

Elizabeth J. Thomovsky
(Purdue Univ. College of Veterinary Medicine, Lafayette, IN)

This book discusses basic monitoring techniques that can be easily performed on emergency canine and feline patients in both first line emergency and primary care clinics. Techniques include blood pressure measurement, capnography, electrocardiography, pulse oximetry, and point of care monitoring ranging from the physical exam to bedside ultrasound and diagnostic tests such as PCV/TP, blood glucose and lactate. Each chapter begins with basic physiology as related to the monitoring technique, before reviewing how the piece of equipment used for monitoring works, pros and cons of the equipment, and limitations of the device. A final section in each chapter gives practical examples of how to use the monitoring technique in a clinical setting.

Hypertension in the Dog and Cat

Jonathan Elliott (Royal Veterinary College, London, UK)

This book provides an in-depth review on various aspects of canine and feline hypertension. Physiology, pathophysiology, epidemiology and pathological consequences of high blood pressure in cats and dogs are discussed. A comparative approach is taken, the underpinning research is critically evaluated and knowledge gaps identified. In addition, the reader is presented with evidence-based treatment strategies. The book targets researchers, graduate students and clinical specialists in small animal internal medicine as well as veterinary clinicians with interest in nephrology, cardiology, neurology and ophthalmology.

Obesity in the Dog and Cat
Martha G. Cline (Red Bank Veterinary Hospital, Tinton Falls, NJ)
As of 2018, pet obesity in the US affects an estimated 55.8 percent of dogs and 59.5 percent of cats, resulting in secondary conditions. A complete and balanced diet accompanied by regular exercise is fundamental to optimize health and longevity in companion animals, meaning overweight pets have reduced quality of life and shorter life expectancy. Seeking to address this major modern-day problem, this book provides a comprehensive review of obesity in small animal medicine.
